STONE FLEET SOLUTIONS
TRUCK REPAIR, ALIGNMENTS, AND PARTS

WINTER 2026–27
New Oxford, PA

Ice melt by the pallet

Sold by the full pallet. Each pallet contains 56 bags at 50 lb each.

PRODUCT	BLEND	PRICE PER PALLET
TruMelt Halite	Solar Salt	**$590**
TruMelt Encapsulated	Encapsulated Salt	**$685**
TruMelt 3%	Magnesium Blend	**$760**
TruMelt 10%	Magnesium Blend	**$855**
TruMelt 12%	Calcium Blend	**$930**
TruMelt 20%	Magnesium Blend	**$1,020**

Applicable sales tax and delivery are extra.
Pricing is subject to confirmation when you order.

TruMelt Halite

Halite Solar Salt Crystals

Recommended Uses | Asphalt driveways and parking areas ♦ Safer around pets and turf

PROS

- Clean solar salt
- Economical and effective
- Dried and free flowing

CONS

- Melts effectively only to 5° F
- Greater risk of concrete damage

Melting Performance	5°F
Concrete Protection	Fair
Slip and Fall Safety	Fair
Free Flowing	Great
User, Turf and Pet Friendly	Good
Clean and Non Tracking	Great
Packaging	50-lb bags, 56 bags/skid

Product Performance

Full Ingredient Disclosure
TruMelt Halite is 99.5% pure oven dried, screened solar salt. Snow fighting professionals, looking for full disclosure of ingredients, need to look no further. TruMelt is true to its name; we disclose the truth about the ingredients and real world effectiveness of our quality ice melt. Halite is an economical choice for commercial and residential applications.

Clean & Free-Flowing
TruMelt Halite is screened to optimal crystal size for maximum traction and accurate spreading. Small dusty fines and large crystals above ¼ inch in diameter are removed. Because it is clump-free, TruMelt is easy and efficient to apply. It is the most free-flowing ice melt on the market. Halite is non-staining and safe for sidewalks and floors.

Pets' & Landscape Safety
TruMelt Halite is safer for pets and turf than calcium-based products. If applied at recommended rates, it will not burn vegetation or pet's paws. **For greater protection of concrete surfaces and melting power, use TruMelt 10%, TruMelt 12%, or TruMelt 20%.**

Premium Ice Melt

Brine Encapsulated Ice Melt Pellets

Recommended Uses | Sidewalks, Steps, and Pavers ♦ Safer around pets and turf

PROS

- Faster Acting
- Dried and free flowing
- Safer for the user, pets and vegetation than calcium based products

Melting Performance	0°F
Concrete Protection	Fair
Slip and Fall Safety	Fair
Free Flowing	Best
User, Turf and Pet Friendly	Good
Clean and Non Tracking	Great
Packaging	50-lb bags, 56 bags/skid

Product Performance

Full Ingredient Disclosure

TruMelt Encapsulated is a premium, sodium chloride-based ice melter pretreated with AgSalt Processing's liquid brine. Snow fighting professionals, looking for full disclosure of ingredients, need to look no further. TruMelt is true to its name; we disclose the truth about the ingredients and real-world effectiveness of our quality ice melt. TruMelt™ Encapsulated is the premier choice for commercial and residential applications. Due to the even coating of brine, TruMelt Encapsulated melts effectively down to a temperature of 0°F.

Clean & Free-Flowing

TruMelt Encapsulated is screened to optimal crystal size for maximum traction and accurate spreading. Small dusty fines and large crystals above ¼ inch in diameter are removed. Because it is clump-free, TruMelt is easy and efficient to apply. It is the most free flowing ice melt on the market. TruMelt Encapsulated is mixed with a green dye for improved visibility during application. Due to the non-staining and tracking qualities of TruMelt Encapsulated, it is safe for use on sidewalks and near entrances.

Pets' & Landscape Safety

TruMelt Encapsulated is safer on concrete than plain salt. Due to the brine, TruMelt™ Encapsulated lowers the refreeze temp and significantly reduces freeze/thaw cycles above 0°F. **For greater protection of concrete surfaces and melting power, use TruMelt 12% or TruMelt 20%.**

TruMelt 3% Magnesium Pellets

Recommended Uses | Asphalt driveways and parking areas • Safer around pets and turf

Melting Performance	0°F
Concrete Protection	Fair
Slip and Fall Safety	Fair
Free Flowing	Best
User, Turf and Pet Friendly	Good
Clean and Non Tracking	Good
Packaging	50-lb bags, 56 bags/skid

PROS

- Economical
- Safer for the user, pets and vegetation than calcium based products

CONS

- Melts effectively only to 0° F
- Greater risk of concrete damage

Product Performance

Full Ingredient Disclosure

TruMelt 3% is a premium blend of 97% oven dried, screened sodium chloride and 3% magnesium pellets. Snow fighting professionals, looking for full disclosure of ingredients, need to look no further. TruMelt is true to its name; we disclose the truth about the ingredients and real world effectiveness of our quality ice melt. TruMelt 3% is the economical choice for commercial and residential applications. Due to the inclusion of 3% magnesium pellets, TruMelt 3% melts effectively down to 0°F.

Clean & Free-Flowing

TruMelt 3% is screened to optimal crystal size for maximum traction and accurate spreading. Small dusty fines and large crystals above ¼ inch in diameter are removed. Because it is clump-free, TruMelt is easy and efficient to apply. It is the most free-flowing ice melt on the market. TruMelt 3% is lightly tinted with a non-staining organic (biodegradable) green colorant to enhance accuracy and visibility. It is non-staining and safe for sidewalks and floors.

Concrete Safety

TruMelt 3% is safer on concrete surfaces than just pure salt. With 3% magnesium pellets, the melting point is about 15 degrees lower than pure salt, reducing freeze/thaw cycles above 0°F. **However, for greater protection of concrete surfaces and melting power, use TruMelt 12% or TruMelt 20%.** In addition, TruMelt 3% is safer for pets and turf than calcium-based products. If applied at recommended rates, it will not burn vegetation or pet's paws.

TruMelt 10%

10% Magnesium Pellets

Recommended Uses | Concrete, sidewalks, steps and pavers ♦ Safer around pets and turf

PROS

- Melting effectiveness to -10° F
- Increased concrete protection against freeze/thaw cycles
- Safer for the user, pets and vegetation than calcium based products

Melting Performance	-10°F
Concrete Protection	Good
Slip and Fall Safety	Good
Free Flowing	Best
User, Turf and Pet Friendly	Better
Clean and Non Tracking	Better
Packaging	50-lb bags, 56 bags/skid

Product Performance

Full Ingredient Disclosure

TruMelt 10% is a premium blend of 90% oven-dried, screened sodium chloride and 10% magnesium pellets. Snow fighting professionals, looking for full disclosure of ingredients, need to look no further. TruMelt is true to its name; we disclose the truth about the ingredients and real world effectiveness of our quality ice melt. TruMelt 10% is the premier choice for commercial and residential applications. Due to the inclusion of 10% magnesium pellets, it melts effectively down to a low temperature of -10°F.

Clean & Free-Flowing

TruMelt 10% is screened to optimal crystal size for maximum traction and accurate spreading. Small dusty fines and large crystals above ¼ inch in diameter are removed. Because it is clump-free, TruMelt is easy and efficient to apply. It is the most free flowing ice melt on the market. TruMelt 10% is lightly tinted with a non-staining organic (biodegradable) green colorant to enhance accuracy and visibility. It is non-staining and safe for sidewalks and floors.

Concrete Safety

TruMelt 10% is safer on concrete surfaces than other less concentrated blends due to the inclusion rate of 10% magnesium pellets. Using 10% magnesium pellets lowers the melting point, minimizes freeze/thaw cycles and provides more protection from concrete damage, such as spalling and chipping. **However, for greater protection of concrete surface and melting power, use TruMelt 12% or TruMelt 20%.** In addition, TruMelt 10% is safer for pets and turf than calcium-based products. If applied at recommended rates, it will not burn vegetation or pet's paws.

TruMelt 12% Calcium Flakes

Recommended Uses | Concrete, sidewalks, steps and pavers

PROS

- Melting effectiveness to -20° F
- Increased concrete protection against freeze/thaw cycles

CONS

- Calcium may burn the skin of the user and pet's paws

Melting Performance	-20°F
Concrete Protection	Better
Slip and Fall Safety	Best
Free Flowing	Best
User, Turf and Pet Friendly	Fair
Clean and Non Tracking	Good
Packaging	50-lb bags, 56 bags/skid

Product Performance

Full Ingredient Disclosure

TruMelt 12% is a premium blend of 88% oven-dried, screened sodium chloride and 12% calcium chloride flakes. Snow fighting professionals, looking for full disclosure of ingredients, need to look no further. TruMelt is true to its name; we disclose the truth about the ingredients and real world effectiveness of our ice melt. TruMelt 12% is the premier choice for commercial and residential applications. Due to the inclusion of 12% calcium flakes, it melts effectively down to a low temperature of -20°F.

Clean & Free-Flowing

TruMelt 12% is screened to optimal crystal size for maximum traction and accurate spreading. Small dusty fines and large crystals above ¼ inch in diameter are removed. Because it is clump-free, TruMelt is easy and efficient to apply. It is the most free flowing ice melt on the market. TruMelt 12% is lightly tinted with a non-staining organic (biodegradable) green colorant to enhance accuracy and visibility. It is non-staining and safe for sidewalks and floors.

Concrete Safety

TruMelt 12% is safer on concrete surfaces than other blends due to the inclusion rate of 12% calcium flakes. Using 12% calcium flakes lowers the melting point, thereby minimizing freeze/thaw cycles and providing more protection from concrete damage, such as spalling and chipping.

TruMelt 20%

TruMelt 20% Magnesium

Recommended Uses | Concrete, sidewalks, steps and pavers ♦ Safer around pets and turf

PROS

- Melting effectiveness to -12° F
- Increased concrete protection against freeze/thaw cycles
- Safer for the user, pets and vegetation than calcium based products

Melting Performance	-12°F
Concrete Protection	Best
Slip and Fall Safety	Better
Free Flowing	Best
User, Turf and Pet Friendly	Best
Clean and Non Tracking	Best
Packaging	50-lb bags, 56 bags/skid

Product Performance

Full Ingredient Disclosure

TruMelt 20% is a premium blend of 80% oven-dried, screened sodium chloride and 20% magnesium pellets. Snow fighting professionals, looking for full disclosure of ingredients, need to look no further. TruMelt is true to its name; we disclose the truth about the ingredients and real world effectiveness of our quality ice melt. TruMelt 20% is the absolute premier ice melt blend for commercial and residential applications. Due to the inclusion of 20% magnesium pellets, it melts effectively down to a low temperature of -12°F.

Clean & Free Flowing

TruMelt 20% is screened to optimal crystal size for maximum traction and accurate spreading. Small dusty fines and large crystals above ¼ inch in diameter are removed. Because it is clump-free, TruMelt is easy and efficient to apply. It is the most free flowing ice melt on the market. TruMelt 20% is lightly tinted with a non-staining organic (biodegradable) green colorant to enhance accuracy and visibility. It is non-staining and safe for sidewalks and floors.

Concrete Safety

TruMelt 20% is safer on concrete surfaces than other less concentrated blends due to the inclusion rate of 20% magnesium pellets. Using 20% magnesium pellets provides more melting power and lowers the melting point. This minimizes freeze/thaw cycles and provides more protection from concrete damage, such as spalling and chipping. In addition, TruMelt 20% is safer for pets and turf due to the gentle nature of magnesium pellets. If applied at recommended rates, it will not burn vegetation or pet's paws.
